

Perfect. Your exam strategy should **not be memorizing slides**. Since you said:

40 marks final exam All content from these slides Questions will be case studies, not direct theory

then the best preparation method is:

Step 1: Understand Concepts Through Visual Maps

Step 2: Learn How Concepts Connect

Step 3: Solve Case Studies

Step 4: Learn How To Identify Which Law / Contract / BCS Principle Applies

EXAM ROADMAP

LECTURE 9A

- |
- |— Computer Misuse
 - |— Hacking
 - |— Data Theft
 - |— Copyright Violation
 - |— Email Abuse
 - |— Identity Theft
 - |— Fraud
 - |— Viruses
- |
- |— Computer Misuse Act
 - |— Unauthorized Access
 - |— Access for Criminal Purpose
 - |— Altering Data

LECTURE 9B

- |
- |— Cyber Crime
- |— Cyber Laws Pakistan
- |
- |— ETO 2002
- |— Cyber Crime Bill 2007
- |— Cyber Crime Act 2015

LECTURE 10

- |
- |— Contracts
- |— Fixed Price Contracts
- |— Consultancy
- |— Contract Hire
- |— Outsourcing
- |— License Agreements
- |— Liability
- |— Health & Safety

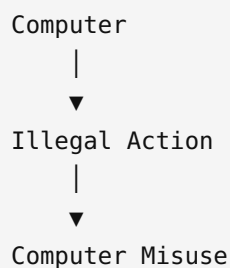

LECTURE 11

- |
- |— BCS Code of Conduct
- |
- |— Public Interest
- |— Duty to Authority
- |— Duty to Profession
- |— Professional Competence
- |
- |— Good Practice
 - |— Project Management
 - |— Security
 - |— Safety
 - |— Change Management
 - |— Quality Management
 - |— Relationship Management

LECTURE 9A

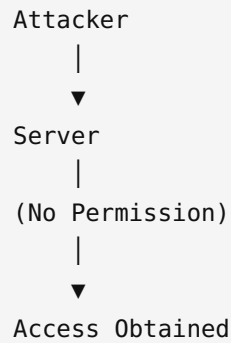

COMPUTER MISUSE

Think of Computer Misuse as:

Types of Computer Misuse

Hacking

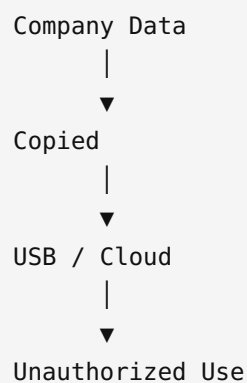

Example:

A student accesses university database using stolen credentials.

➔ Hacking

Data Misuse

Example:

Employee copies customer database.

Copyright Violation

Movie
|
Copy
|
Upload
|
Internet

Example:

Uploading paid Netflix content.

Identity Abuse

Victim Identity
|
▼
Stolen
|
▼
Used for Purchase

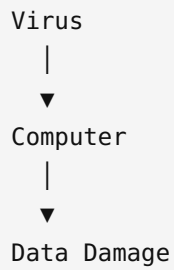

Example:

Using another person's credit card online.

Fraud

Fake Product Image
|
▼
Customer Pays
|
▼
Wrong Product Sent

Virus

COMPUTER MISUSE ACT

Remember:

3 Crimes

1. Unauthorized Access
2. Unauthorized Access
+ Criminal Intent
3. Altering Data

Example

Student enters teacher's account.

➔ Crime #1

Student enters bank system and plans to steal money.

➔ Crime #2

Student writes malware that deletes records.

→ Crime #3

Easy Memory Trick

ACCESS
ACCESS + CRIME
CHANGE DATA

LECTURE 9B

CYBER CRIME

Definition:

Computer
or
Network

Used as
Tool
Target
or Crime Scene

Cyber Crime Types

Remember Table:

Crime	Example
Financial Crime	Credit Card Fraud
Email Spoofing	Fake Email
Cyber Stalking	Online Harassment
Defamation	False Statements
Gambling	Illegal Betting
Forgery	Fake Documents

TARGETS OF CYBER CRIME

Think of 3 Levels:

```
Cyber Crime
|
├─ Individual
├─ Organization
└─ Society
```

Example

Individual

Identity Theft

Organization

Database Hacking

Society

Cyber Terrorism

PAKISTAN CYBER LAWS

Very Important for Exam

Timeline:

2002

|

└ Electronic Transaction Ordinance

2007

|

└ Cyber Crime Bill

2015

|

└ Prevention of Electronic Crimes Act

ETO 2002

Purpose:

Make Electronic Documents Legal

Example:

Online contract.

Digital signature.

Online business transactions.

Cyber Crime Bill 2007

Focused on:

Cyber Terrorism
Fraud
Forgery
Spamming
Cyber Stalking

Cyber Crime Act 2015

Most Exam Questions Come Here

Unauthorized Access

Hack System
|
▼
6 Months Jail
or Fine

Identity Crime

Steal CNIC
↓
Use It
↓
Identity Crime

Cyber Terrorism

Attack Govt System

Heavy punishment.

EASY LAW COMPARISON

LECTURE 10

CONTRACTS

Most Important Lecture for Case Studies

Contract

```
Party A
  |
Agreement
  |
Party B
```

Requirements:

```
Intent
+
Competence
+
Consideration
```

Remember:

```
Want Contract
Can Contract
Give Something
Receive Something
```

FIXED PRICE CONTRACT

```
Client
  |
Pays Fixed Amount
  |
Developer
  |
Delivers System
```

Example:

Website project = \$10,000

Regardless of effort.

COMPONENTS OF CONTRACT

Contract

- |
- |— Product
- |— Deliverables
- |— Ownership
- |— Confidentiality
- |— Payment
- |— Warranty
- |— Maintenance
- |— Termination
- |— Arbitration

OWNERSHIP

Case:

Developer creates software.

Question:

Who owns source code?

Answer:

Depends on contract.

CONFIDENTIALITY

Client Secret
|
Developer Learns
|
Cannot Disclose

PAYMENT STRUCTURE

15%
Start

65%
Development

25%
Acceptance

10%
Warranty End

ACCEPTANCE TESTING

Software
|
Testing
|
Pass
|
Accepted

No new tests can be added later.

Very important.

WARRANTY

Accepted Software

90 Days

Free Bug Fixes

CONTRACT TYPES

Contract Hire

Developer

Provides Staff

Client Manages

Consultancy

Expert

|

Advice

|

Report

Output = Recommendation

Time & Materials

Hours Worked

+

Material Cost

=

Payment

Outsourcing

Company

|

Transfers IT Operations

|

External Company

Example:

Bank outsources IT department.

License Agreement

Software
|
Permission To Use

Not ownership.

LECTURE 11

BCS CODE OF CONDUCT

Think:

Good IT Professional
|
▼
Acts Ethically

FOUR AREAS

Public Interest

Duty to Authority

Duty to Profession

Professional Competence

PUBLIC INTEREST

Example:

Software engineer finds safety issue.

Must report.

Public safety first.

DUTY TO AUTHORITY

Boss Says:
Hide Security Risk

Professional Says:
No

DUTY TO PROFESSION

Protect Reputation
Of IT Profession

PROFESSIONAL COMPETENCE

Know Skill?

|

Yes → Do Work

No → Learn First

Never claim skills you don't have.

BCS GOOD PRACTICE

Remember 6 Areas

Project Management

Relationship Management

Security

Safety

Change Management

Quality Management

Easy Memory:

PRSSCQ

Project

Relationship

Security

Safety

Change

Quality

CASE STUDY 1

A university student uses a stolen password to enter the examination server and view result data before announcement.

Questions

1. What crime occurred?
2. Which concept applies?
3. Which law is violated?

Solution

Unauthorized Access

Computer Misuse

Cyber Crime

Computer Misuse Act

Offence #1

CASE STUDY 2

An employee copies customer records onto a USB drive and sells them to another company.

Solution

Data Misuse

Unauthorized Copying

Privacy Violation

Cyber Crime

CASE STUDY 3

A software company develops an HR system.

After completion, the client demands 50 new features without paying extra.

Solution

Requirement Change

Contract Variation

Additional Payment Required

Fixed Price Contract

CASE STUDY 4

A hospital management system is delivered.

After 20 days a critical bug appears.

Solution

Warranty Period

Developer Must Fix

No Additional Charge

CASE STUDY 5

A company hires 5 developers from another software house and directly supervises them daily.

Solution

Contract Hire

Client Controls Staff

CASE STUDY 6

An IT consultant reviews business operations and submits a report recommending automation.

Solution

Consultancy

Deliverable = Report

CASE STUDY 7

A network engineer claims expertise in cloud security but actually has no experience and causes major damage.

Solution

BCS Professional Competence Violated

Misrepresentation

Professional Misconduct

CASE STUDY 8

A software engineer discovers a dangerous security vulnerability affecting thousands of users but hides it to protect company reputation.

Solution

Public Interest Violated

Duty to Authority Violated

BCS Code of Conduct Breached

HIGH-PROBABILITY FINAL EXAM QUESTIONS

1. University database hacked.

2. Bank customer identity stolen.
3. Company data leaked by employee.
4. Software delivered late under fixed-price contract.
5. Client requests requirement changes.
6. Warranty period dispute.
7. Outsourcing IT operations.
8. Software licensing violation.
9. Professional ethics dilemma.
10. Cyber terrorism attack on government systems.

These 10 scenarios alone cover roughly **80–90% of the concepts in your uploaded slides**.

If you want, I can next create a **full 40-mark mock final exam with 20 realistic case studies and complete model answers**, matching exactly the style universities typically use for these topics.

Pakistan Cyber Law Timeline

Major cyber laws covered in the course.

law year ETO 2,002 Cyber Crime Bill 2,007 Cyber Crime Act 2,015
